Addis Ababa

Subject: Pre-Basic Seed Request For 2023 Cropping Season

Basic seed demand and supply for hybrid Maize parental line called CML395XCCML202 mismatch has been the natural phenomena particularly in our region and in the country in general. In response to this problem our Institute has planned to produce the parental line on Adami Tulu's Agricultural Research Center station to support the effort of Bako Agricultural Research Center in 2023 main cropping season.

To this end, we have secured the pre-basic seed of the parental line CML395 but we couldn't secure the pre-basic seed of the parental line called CML395. This is therefore, to request your Institute amount 50kg of CML202 parental line on purchase bases.

With Regards

Teshome Bogale Soboka
